# Xpressive

After creating factory patches for U-HE Repro-5, I just couldn't stop myself and I'm still running in high gear exploring all the possibilities of this lovely sounding new synth.

**Xpressive** became an all rounder soundset.  
68 instantly playable, highly musical patches.

Emphasis on the 80's synths-soupergroups like Alphaville, Duran Duran - listen to the end of the demo.

Warm and analouge sounding pads, keys, plucked and lead instruments.

Beside the modern BPM or plucked patches there are many useful and expressive "bread and butter" sounds to help jumpstart your songwriting process.

So here it is: 68 greatly musical patches.

The expression of the patches are highly optimized through midi controllers such as Velocity (vel), PitchBend (Pb), and Modwheel (Mw).

Please read the patch notes for controller information and tips.

A Cubase .cpr and a Midi file of the demo are helping understand some suggested use of the patches!
